

DILUN PANDUKA

Associate Tech Lead | Backend & DevOps Engineer

+94 77 292 8483 | dilunp4@gmail.com | Battaramulla, Sri Lanka | [linkedin.com/in/dilun-panduka-1a907415a](https://www.linkedin.com/in/dilun-panduka-1a907415a)

PROFESSIONAL SUMMARY

Results-driven Backend & DevOps Engineer with 5+ years of experience building and scaling enterprise-grade microservices in the fintech and payments domain. Proven track record deploying containerized workloads on Azure Kubernetes Service (AKS) and VMware Tanzu, automating CI/CD pipelines, and leading 30+ member engineering teams. Adept at translating complex business requirements into robust, secure, and high-performance Java Spring Boot solutions. Currently driving delivery quality, DevOps culture, and team growth as Associate Tech Lead at a leading Sri Lankan fintech.

TECHNICAL SKILLS

Languages & Frameworks	Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, Thymeleaf
Cloud & DevOps	Azure (AKS, Azure DevOps), VMware Tanzu, Docker, Kubernetes, CI/CD Pipelines, Shell Scripting
Databases	Oracle, MySQL, PostgreSQL — schema design, query optimization, transaction management
Architecture	Microservices, RESTful APIs, Multi-tier (Web / App / DB), On-premises & Hybrid Cloud
Practices & Tools	Code Review, Agile/Scrum, Performance Monitoring, Log Analysis, Unit Testing
Leadership	Team Management (30+ members), Mentoring, KT Sessions, Performance Evaluations

WORK EXPERIENCE

Associate Tech Lead

Apr 2025 – Present

Paymedia (Pvt) Ltd. — Colombo, Sri Lanka

- Lead and manage a 30+ member cross-functional engineering team, coordinating delivery across 5+ concurrent fintech projects.
- Introduced standardized DevOps pipelines and deployment checklists, reducing production incidents by improving pre-release validation.
- Conduct weekly code reviews and biweekly knowledge transfer (KT) sessions, raising team code quality and reducing onboarding time for new hires.
- Design and deploy on-premises microservices architectures on VMware Tanzu, collaborating with infrastructure specialists for zero-downtime rollouts.
- Own annual performance reviews, leave planning, and workload distribution for a 30+ member team, improving resource utilization.

Senior Software Engineer

Nov 2023 – Mar 2025

Paymedia (Pvt) Ltd. — Colombo, Sri Lanka

- Designed and deployed containerized Spring Boot applications on Azure Kubernetes Service (AKS), improving system scalability and resilience for payment processing workloads.
- Automated CI/CD pipelines using Azure DevOps, reducing manual deployment effort and increasing release frequency.
- Partnered with business stakeholders to translate complex payment domain requirements into technical solutions, ensuring alignment with performance SLAs.
- Led backend API development for core fintech features, maintaining high availability standards in a 24/7 production environment.

Software Engineer

Aug 2021 – Nov 2023

Paymedia (Pvt) Ltd. — Colombo, Sri Lanka

- Developed and maintained Spring Boot backend APIs deployed across multi-tier architectures (web, app, and DB servers) in both cloud and on-premises environments.
- Implemented Spring Data JPA and Hibernate for ORM, optimizing data access patterns for large-scale financial transaction volumes.
- Integrated Spring Security with role-based authentication and authorization (RBAC), strengthening application security posture.
- Worked extensively with Oracle and MySQL databases — designed schemas, wrote complex queries, and optimized indexes for production performance.
- Strengthened monitoring and alerting processes, improving post-deployment stability and reducing mean time to resolution (MTTR).

Intern Software Engineer

Apr 2019 – Aug 2020

Virtusa Inc. — Colombo, Sri Lanka

- Developed an Angular web application, building reusable components and integrating RESTful APIs for a client-facing product.
- Built a React-based admin dashboard with a Spring Boot backend, implementing data visualization and role-based access features.
- Participated in Agile ceremonies, wrote unit tests, and contributed to bug fixes across both frontend and backend codebases.

EDUCATION

Bachelor of Information Technology (BIT)

2016 – 2019

University of Colombo School of Computing (UCSC)

KEY PROJECTS

Payment Gateway Microservices Platform

Java · Spring Boot · Docker · Kubernetes (AKS) · Azure DevOps · Oracle

Architected and delivered a suite of RESTful microservices powering core payment processing flows. Containerized all services with Docker and orchestrated on AKS, achieving high availability for 24/7 financial transaction workloads. Automated the full CI/CD pipeline via Azure DevOps, eliminating manual release steps and enabling frequent, low-risk deployments.

On-Premises Microservices Migration (VMware Tanzu)

Java · Spring Boot · VMware Tanzu · Shell Scripting · Linux

Led the design and rollout of an on-premises microservices architecture on VMware Tanzu as Associate Tech Lead. Collaborated with infrastructure specialists to define deployment standards, configure environments, and execute zero-downtime go-lives for mission-critical fintech services.

Admin Dashboard — Full-Stack Internal Tool

Spring Boot · Spring Thymeleaf · JavaScript · jQuery · Bootstrap · MySQL

Built an end-to-end internal admin dashboard, developing Spring Boot backend services and a Thymeleaf/Bootstrap frontend. Implemented role-based access control (RBAC), real-time reporting modules, and data visualization features, enabling operations teams to monitor and manage payment flows without engineering support.

Angular Web App & React Dashboard (Virtusa)

Angular · React · Spring Boot · RESTful APIs · Unit Testing

Developed a client-facing Angular web application during internship at Virtusa, building reusable components and integrating backend REST APIs. Separately built a React-based admin dashboard powered by a Spring Boot backend, featuring data visualization and role-based access control. Gained broad full-stack exposure across both frontend frameworks alongside backend Java development in an Agile team environment.
